Workshop: German Export Declarations with ATLAS

ATLAS Export is the electronic “gateway to the world” for every exporter in Germany – the e-customs interface through which nearly all exports must be declared. Learn in a simulation how to transmit your export declarations to the ATLAS e-customs system. We also look at possible incoming messages – releases, endorsements of exit, orders for a customs examination, etc.

Aim of the seminar:

Understand and train customs’ practices in Germany in the ATLAS Export e-customs system.

Content:

- Export declarations: Customs clearances with the actual ATLAS-release
- Corrections
- Possible simplifications
- ATLAS customs codes such as Y901
- Calculating statistical values
- Repairs processing

Target group:

English speaking Customs Managers with responsibilities in Germany who want to improve their understanding of customs processes

Details
